ABOUT US

Protecting Our Own

KEGAN Safety Solutions, trading as KEGSafe Zimbabwe, started its operations in Zimbabwe in 2017, originally operating under licence of BRADY South Africa. It has since evolved into a fully fledged independent company.

With deep roots in Zimbabwe and a growing footprint across Africa, we are committed to protecting the African workforce. For us, the health, Safety, and protection of the workplace is not an international add-on. It is a local necessity.

We serve Industries across Zimbabwe and the African continent, ensuring that every worker, every father, every mother, every brother, and every sister comes back home safely.

At KEGSafe, we believe that Safety is not just a policy. It is personal. As a proudly African company under KEGAN Brands Africa, we specialise in Workplace Safety systems, processes, and lockout devices that protect the people, plants, and facilities that drive our continent forward.

When we look at the workplace, we do not just see opportunities. We see our own.

OUR JOURNEY AND OUR PHILOSOPHY

Designed for Africa, by Africans

KEGSafe was established with a simple but powerful purpose: to provide practical, life-saving Workplace Safety solutions that are designed for Africa, by Africans. As part of KEGAN Brands Africa, we saw the urgent need for locally driven Safety systems that genuinely protect workers in Zimbabwe and beyond.

We are proud to say that KEGSafe has become a symbol of Safety, reliability, and local commitment in the Industries we serve.

Since our inception, KEGSafe has been at the forefront of designing, supplying, and supporting specialist Safety devices and lockout systems that prevent workplace injuries and fatalities.

Over the years, we have grown into a trusted name in Zimbabwe and across the African continent, delivering not just products, but peace of mind.

WHAT GUIDES US

Vision, Mission and Values

Our Vision

To be Zimbabwe's most trusted provider of Workplace Safety, compliance, and risk management solutions, helping Organisations achieve world-class Safety performance while protecting people, assets, and the environment.

Our Mission

To empower Organisations through innovative Safety solutions, professional Training, expert Consultancy, compliance services, and Industry-leading products that create safer, healthier, and more productive workplaces.

Our Core Values

Safety First

We place the health, Safety, and well-being of people at the centre of everything we do.

Professional Excellence

We deliver practical, reliable, and high-quality solutions that exceed client expectations.

Integrity

We operate with honesty, transparency, and accountability in all our engagements.

Innovation

We continuously seek smarter and more effective ways to solve Workplace Safety challenges.

Partnership

We build lasting relationships by working collaboratively with our clients to achieve sustainable Safety improvements.

LEADERSHIP

The Organisation

Vusumuzi Nkala

FOUNDER AND MANAGING DIRECTOR

Mr Vusumuzi Nkala, affectionately known as Vusa, is the Founder and Managing Director of KEGAN Safety Solutions T/A KEGSafe. He has been pioneering the concept of Protecting Africa and Protecting Our Own, having been inspired and trained by the leading global Safety products manufacturer and retailer.

Faith Nkala

CO-FOUNDER AND DIRECTOR

Faith, the KEGSafe Co-Founder, has more than 20 years of experience in management and leadership, and brings a wealth of knowledge in team leadership and strategy.

PRODUCTS AND SERVICES

Comprehensive Safety Solutions

Food Safety

HACCP implementation, Food Safety Audits, hygiene Training, and compliance support.

Lockout Tagout

Complete hazardous energy control solutions including procedures, Training, equipment, and compliance support.

Workplace and Facilities Safety

Safety products, risk management, building Safety inspections, maintenance Safety programmes, and contractor management for safer workplaces and facilities.

Mining and Industrial Safety

Specialised Safety services tailored to Mining, Manufacturing, engineering, and industrial operations.

Spill Control Solutions

Spill prevention, containment, environmental protection, and emergency response solutions.

Consultancy, Audits and Training

Expert Safety Consultancy, independent Audits and inspections, and professional Training programmes to improve compliance, competence, and Safety performance.

Machine Condition Monitoring Systems

Condition-based monitoring that uses real-time machine sensor data to anticipate machine Health and Safety, and to predict potential issues before they become failures.

IN FOCUS

Lockout Tagout Products and Training

Lockout Tagout products and devices are only part of what you need. Your people need Training as well.

Workplace Safety is a paramount concern for both employers and employees. Accidents and injuries not only affect the well-being of workers but can also result in financial losses for businesses.

Lockout Tagout (LOTO) Safety Training is a critical component of maintaining a safe work environment. In all our Training we emphasise the importance of LOTO, its procedures, and its role in preventing workplace accidents.

LOTO Safety Training applies across Industries, including Manufacturing, Construction, and Healthcare. Each Industry has specific equipment and energy sources, but the principles of LOTO remain consistent.

Workplace Safety Audits

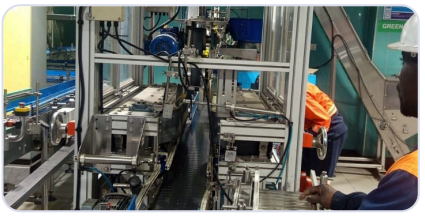
A Safety Audit is a critical and structured examination that assesses an Organisation's Safety protocols, identifies potential hazards, and ensures adherence to established Safety standards and regulations.

It is a preventive measure. It keeps the workplace safe and compliant, fosters a Safety-conscious culture, promotes the well-being of employees, and contributes to the Organisation's overall success and sustainability.

Machine Condition Monitoring Systems

Machine condition monitoring, also known as condition-based monitoring, is a maintenance approach that anticipates machine Health and Safety. It relies on real-time machine sensor data to predict potential issues.

The techniques extend across rotating machinery, auxiliary systems, and components such as compressors, pumps, motors, and presses, and consider efficiency, wear and tear, performance indicators, usage statistics, and maintenance records.



OUR PROMISE TO CUSTOMERS

Our Products Protect Our Own

We have a full understanding of the local, regional, and African markets. We understand the importance of enhanced Safety awareness and of processes that ensure our African families come back home safely after work. For us, Africa is not a market or just an opportunity. We see Africa as home, and the way we serve our customers embodies that spirit of community.

Product

We ensure product availability, at the expected quality and certification.

Price

We ensure the product is available at the expected level of quality, and at a price that is competitive.

Promotion

We run Safety awareness campaigns throughout the year. Our goal is to show that Zero Harm is possible.

Place

Our products and services are available nearer to you than you think.
